

A dynamic photograph of two athletes on the deck of a sailboat. The athlete in the upper left is wearing a grey long-sleeved shirt with a teal logo, dark shorts, and a black cap, handling a white sail. The athlete in the lower right is wearing a light blue t-shirt, dark shorts, and sunglasses, holding a silver cylindrical object. The background shows the sailboat's mast and sails against a blue sky with white clouds.

INNOVATIVE SOLUTIONS FOR SPORT

POWERED BY TRIMARAN

70 RUE JEAN BLEUZEN
92170 VANVES, FRANCE
TEL: +33 1 41 06 62 62

TRACKING SYSTEM

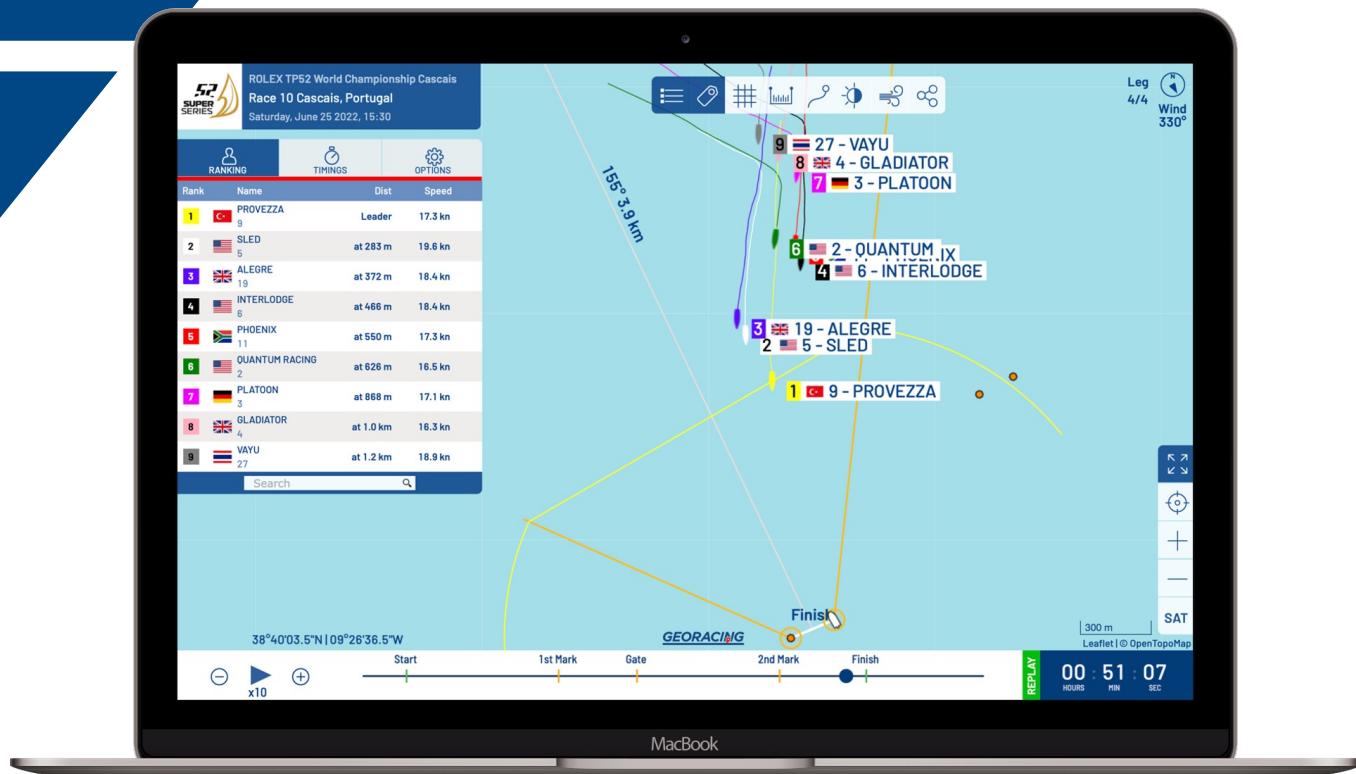

- Dimension: 39.9 x 26.7 x 77.9mm
- GPS Accuracy: 1 m
- Weight: 93g
- Water Resistant
- Emergency Button
- OTA Control (remote)
- LTE Cat M1 with 2G Fallback
- 14 to 70 hours autonomy
- Vibration Feedback
- Rapid Installation
- Up to 10 000 Buffer Messages
- Temperature Range: -20C ~ +60C
- Li-Polymer, 2600 mAh

DIGITAL

***WEB & MOBILE
APPLICATIONS***

WEB RACE VIEWER

- Compatible with any web browser (Safari, Chrome, Firefox...).
- Same viewer for web and mobile devices (iOS & Android).
- Speed, heading, ranking, timing, distances, distance to finish, ruler.
- Different layers of cartography (MAP, SAT...).
- Participants Names, flags and bib numbers.

DYNAMIC IFRAME

- Easy to embed in your website and mobile app by copy-pasting a line of code.
- Dynamic content: race listing, status, dates, locations.
- Fits in any area of your website which displays the iframe.
- Ability to show the current status of your race(s) (Upcoming, Live or in Replay).

ABOUT US

SOFTWARE DEVELOPERS

ABOUT US

TRIMARAN

We are a French computer graphics studio with expertise in 3D animation, visual effects and software development. For the last 30 years, our creative team has been exploring digital imagery, incorporating real footage, 2D/3D integration, compositing, matte painting and virtual reconstruction in CGI.

In 2003, our company expanded into sports working for the Tour de France (ASO-France Televisions) and invented the concept of presenting the route of a sporting event in 3D.

GEORACING

In 2010, we established a dedicated sports department, named GEORACING, with the goal of enhancing the fan experience during hard to follow events such as sailing, cycling, car racing... Using cutting-edge GPS tracking technologies and visualization tools we can now significantly improve the storytelling of these sports for both TV and digital platforms.

AN AWARDED SOLUTION

Winner of an IABM Design & Innovation Awards 2014 at IBC Show, Amsterdam.

Nominated in Best Audiovisual Innovation Category Genie Awards at Paris Images Digital Summit 2015.

Winner of the Grand Prix de France Innovation 2018 organized by the French Federation of Motorsport.
